# Letter of recommendation

To whom it might concern,

It is my pleasure to give my sincere recommendation to Dmitrii Vavel who worked for 7pace GmbH for 4 years as a Senior Software Engineer.

Dmitrii demonstrated outstanding skills in frontend software development and deep knowledge of React.js framework.

During the time Dmitrii worked for 7pace he brought in entire original approach and brand-new industry-standard architecture of frontend part of our application 7pace Timetracker.

Not only did he provide technical excellence as an individual contributor but also conducted a number of training courses and maintained good coding practices education for 7pace engineering teams.

I believe that Dmitrii would have excellent fit into any software engineering team. Shall you have any further questions please feel free to contact me at [sergey@7pace.com](mailto:sergey@7pace.com) and I will be happy to any of them you have.

Sergey Ryabtsev

Chief Information Officer

7pace GmbH
